

MAY 2001

Hi! My name is Erica Baffa, and I am very honored to be chosen as patient of the month.

I have been seeing Dr. Kyla Tremper for almost four years. I was diagnosed with scoliosis. It is hereditary from my dad.

I, last month, have also been diagnosed with what is called "fallen arches". That means that the arch in my foot, when I step onto ~~the~~ ^{THE} ground, goes flat.

I was very scared on my first visit to Tremper Chiropractic, especially the popcorn adjustment.

I'm doing much, much better, thanks to Dr. Kyla Tremper, and I will continue to see her (she is a wonderful doctor and person). (And I love her very much).
