

Joseph Collins

October 2001

I have had over the years a very stiff back problem. Answer was take Advil, aging process. At the Westchester Fest, I saw this tent and saw a "have your spine checked", so why not nothing to lose. I found out they cared. There was a problem. Not serious yet, work had to be done. They cared.

The doctors were very thorough and explained what had to be done and why. They answered questions and answered in very simple terms. They cared.

September 11, was a very difficult day for me. I had an appointment that day. They cared.

The stiffness in my lower back has gone away, but still work remains. They cared.

When you enter the office you feel the warmth. The willing to help. They all care.

Every month they have a quiz. Here is my little quiz for fun:

Who is Dr. K.?

Who is Dr. J.?

Who is the Boss Lady?

Who is the Money Lady?

Who is the Music Lady?

Thank You. You all really do care.
